The Fetal Medicine Unit was established in PSG Hospitals in February 2018. Over the past years the team has worked with care and commitment to provide the highest standard of care for expectant mothers and their unborn babies. The Unit caters to pregnant women from PSG Hospitals and referred from various hospitals in 3-4 surrounding districts thereby strengthening our position as a center of excellence in perinatal care in the region. We provide a wide spectrum of interventions like procedures for diagnosis (amniocentesis, chorionic villous sampling, cordocentesis) and therapy (Intrauterine transfusion for fetal anaemia, Laser for Twin to twin transfusion syndrome, selective fetal reduction for higher order multiples, shunting procedures, Radiofrequency and Microwave ablation)
